MEMORANDUM FOR: Special Assistant to the Director for Planning and Development

REFERENCE : Memorandum for D/DCI, dated 19 May 1958
(Chal-0138)

25X1A

1. In accordance with conversation between you, [REDACTED] and me on 22 May, I feel that in spite of your magnificent--and in addition, lucky--record to date, the principle of providing an airborne spare for important penetrations, is a sound one and should be followed.

2. There must be flexibility in the application of this principle, of course, based upon practical considerations, but not flexibility based upon a question as to the validity of the principle.

TOP SECRET

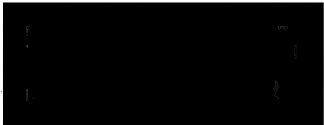

Memo. for SA P & D

Subject —

Ref. Chal-0138, 19 May '58

In accordance with our
conversation between you,  25X1A

25X1A

 + me on 22 May, I

feel that in spite of your
magnificent — and in addition,

lucky — record to date, the

principle of providing an

air borne space for important

penetration, is a sound one &

should be followed.

There must be flexibility
in the application of this
principle, of course, ~~but~~
based upon practical considerations, but
not flexibility based upon
a question as to the
validity of the principle.
